* Figure does not meet standard of reliability or precision, estimation is based on fewer than 20 events in the numerator or denominator. .

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

* Figure does not meet standard of reliability or precision, estimation is based on fewer than 20 events in the numerator or denominator. .

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

--- Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

* Figure does not meet standard of reliability or precision, estimation is based on fewer than 20 events in the numerator or denominator. .

... Category not applicable

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

NOTES:
For 1932-34, deaths of Mexicans are included with total deaths for the white population; but by age, are included with deaths for the nonwhite population. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both sexes.....	40	60	64
Male.....	28	41	45
Female.....	12	19	19
